About Me

I am an aspiring full stack python developer who recently graduated from a coding bootcamp. Prior to my entry in the tech field I studied product design and public relations, with a focus on user experience and design research. My education granted me the ability to understand and bridge the gap between the wild imaginings of the creative world and practicalities of engineering.

I am an ideator, with a strong leadership background, and the diligence to match, who's always looking at the world around me to find problems that need solving.

I'm looking for a company that wants to break down conventional approaches to many of the world's problems: to influence and advance products that aim to help underprivileged communities, create solutions for those with physical or mental disabilities, or work to provide green solutions.

Projects

Personal Site, C#, ASP.Net

My personal site is a compilation of web development projects, as well as my undergraduate product designs and design research work

Epic Academy Behavior Tracker, JavaScript, React, Socket.io, Express, Node, MongoDB

A behavior tracker customized to the school's code of conduct. It gives co-teachers the ability to seamlessly record infractions, updates in real-time with Socket.io and utilizes quick navigation, not to disrupt the lesson flow

Notify, Python, Django, jQuery, MySQL

Notify is a spotify clone for Creative Commons music, allowing users to upload their own work, follow musicians and create playlists of your favorite up and coming artists

Employment

Coding Dojo, Chicago, IL

February 2018 - May 2018

Full Stack Developer Apprenticeship
Logged over 1,500 hours of coding experience
Developed multiple personal projects, site clones and single purpose applications

Banana Republic, Chicago, IL

November 2016 - Current

Sales Associate / Cashier / Customer Service
Mainly work as a sales associate, multitasking between customers and store upkeep
Cashier trained, handling complex transactions and upholding customer information security

The Lantern Newspaper, Columbus, OH

September 2011 - June 2012

Design Editor
Created page layouts and the majority of informational graphics and visual elements
Co-developed a more modern style guide for the writers and designers of the paper

Education

Coding Dojo, Chicago, IL

February 2018 - May 2018

Python - Flask, Django, MySQL
Javascript - Angular, Node, Express, Socket.io, MongoDB/Mongoose
